## PRODUCT INTRODUCTION

### What's in the box?

- 1 Printer
- 2 USB to USB-C
- 3 USB Flash Drive
- 4 USB Cable
- 5 Adapter
- 6 Power Cable
- 7 After-sale Card
- 8 Card
- 9 Labels
- 10 User Manual

## QUICK PRINTER INSTALLATION

**Note:** Please use the power adapter provided by MUNBYN.

## LABEL SETUP

**Note:** Before using the printer to print labels, please calibrate the paper size.

## Label size calibration:

1. Turn on the printer.
2. Press FEED button and hold on.
3. Release the button when you hear one 'Di' sound.
4. Then, the printer will calibrate the label size.

## DRIVER INSTALLATION

Support downloading driver files via USB flash drive or download link.

Printer driver download link: <https://munbyn.biz/941d>

Tutorial video:

For Windows : <https://munbyn.biz/941win>

For Mac OS: <https://munbyn.biz/941mac>

### Warning:

The print head (TPH) will be extremely hot after printing. Do not touch it or any parts around it.

## WINDOWS DRIVER INSTALLATION

**Note:** Please connect to the computer first and then turn on the printer.

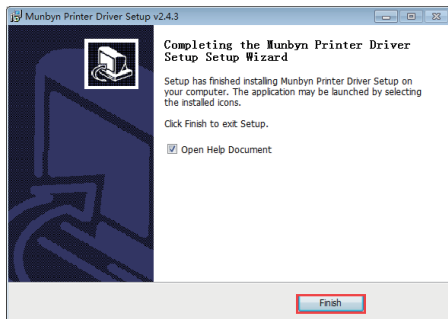

1. Open the driver software you downloaded.

2. Click on "Install" to start installing the driver.

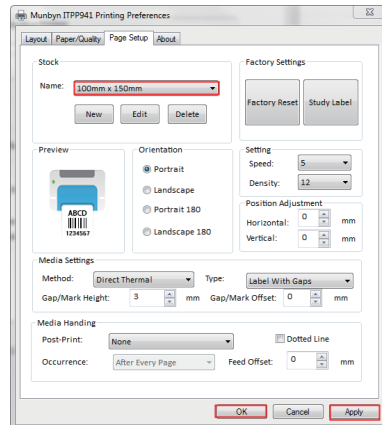

3. Follow the guideline to install until "Finish" appears, then we can use our printer to print shipping labels.

4. Set the printer paper size.

5. Choose 100×150mm(4×6") label size and apply, then we can use our printer to print shipping labels.

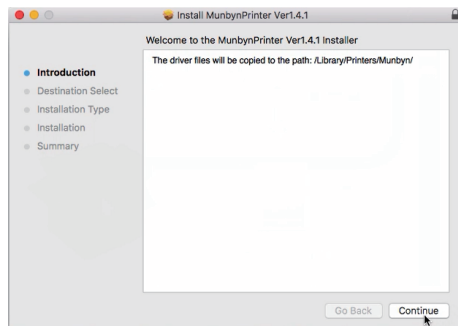

# MAC DRIVER INSTALLATION

**Note:** For Mac OS, please make sure that the USB cable is connected to the Mac computer first, and then to the printer. If the printer is offline, please restart your printer.

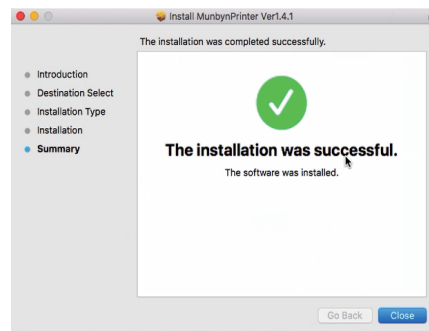

1. Open the driver software you downloaded.

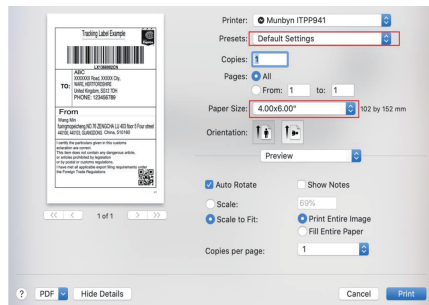

2. Start installation.

3. Follow the guideline to install until "The installation was successful" appears, complete.

4. Page Setup, choose 4x6" (100x150 mm), then click Presets to save the setting.

Paper shortage	OFF	Flashing (every 1 second)
Cover is not closed	OFF	Flashing (every 1 second)
Paper recognition error	OFF	Flashing Red
Wrong cable connected or power off	OFF	OFF

## FAQ

**Q1: When the printing is too faint, how to adjust the density and printing speed?**

**A1:** For Windows : Printer Preferences → Page Setup → Setting For Mac OS: Can be set in drop-down menu under 'Printer Features'

Tutorial vedio : <https://munbyn.biz/94ldsv>

**Q2: What can I do if paper is jammed or there are white spots in my print?**

**A2:** Turn the printer off, and let the printer cool down naturally. Use the pad with alcohol to wipe the printer head clean.

Tutorial vedio : <https://munbyn.biz/94lpjv>

**Q3: Why the printer is skipping labels or continuously feeding?**

**A3:** Make sure your computer does not send a print command to ITPP941, disconnect the USB cable, and then run the automatic label identification function.

Tutorial video : <https://munbyn.biz/94lcfv>

**Q4: Why the printer print extra blank labels after the one successful print?**

**A4:** Please check if the paper size setting of the printer is correct and adjust the scale and margins in preview page or page setup when you are printing from browser.

Tutorial video : <https://munbyn.biz/94lobv>

### Q5: Why I am printing blank labels?

**A5:** Make sure your labels are 'Direct Thermal' labels and the label that you peel off should be facing the ceiling when it comes out of the printer.

Tutorial video : <https://munbyn.biz/941pbv>

### Q6: How can we print the label that is not in standard 4\*6 inch, such as the USPS?

**A6:** You can use the screenshot to print the label in correct size.

Tutorial video : <https://munbyn.biz/941arv>

### Q7: How to print self-test label?

**A7:** The self-test label can be used to determine whether the machine is malfunctioning and whether the printing performance is good. You can print self-test label as follows.

1. Turn on the printer.
2. Press FEED button and hold on.
3. Release the button when you hear two 'Di' sound.
